

AC Cruise Control Tester

CTI Model #232

FEATURES:

The CTI # 232 AC Cruise Control Tester will test the following GM AC Rochester Cruise Control Systems:

- The new "Electro-Motor" (stepper motor) system.
- AC Custom Cruise III with high frequency module.
- AC Custom Cruise III with low frequency module with adapters included.

The CTI # 232 will test the complete cruise system and the following system components:

- All turn lever switches: CRUISE ON/OFF; SET/COAST; RESUME/ACCELERATE.
- All brake and clutch switches.
- SPS, vacuum and vent solenoids.
- Cruise III and Electro-Motor control modules.
- Complete vehicle cruise harness.

BENEFITS:

- Enables service technician to locate defect quickly and easily.
- Fast and thorough test of the entire system, not just the vehicle harness, without running the engine while testing.
- Prevents damage to vehicle harness during harness testing by eliminating the need to "back probe" the connectors.
- Saves time by improving testing accuracy and eliminating customer "comebacks."

The CTI # 232 simply connects between the control module and the vehicle harness. The CTI # 232 comes complete with:

- AC Custom Cruise III and Electro Motor cables attached.
- Complete covered cable assembly for durability.
- All connector locks removed for convenience working under the dash.
- Protective vinyl boots on all connectors.
- Low frequency adapters included.
- Complete instruction manual including vehicle system schematics.
- Sturdy plastic carrying and storage case.
- 2 Year Limited Warranty
