

Idle Air Management Tester Kit

CTI Model #220 Patented

This new Idle Air Management Test Kit enables the technician to test the complete idle air subsystems on GM, Ford, Chrysler, AMC, and many more European model cars and light trucks. These testers allow the technician to evaluate the motor device as well as the computer inputs and outputs for idle air control. For additional information, see individual product brochures.

The CTI #220 consists of the following CTI products:

#222C Chrysler IAC Kit Including:

- #222B IAC Motor Tester - Chrysler
